## KEY PROJECTS

### 1. ECOKART

Full-featured e-commerce platform using PHP & MySQL with cart management, user authentication, and responsive design.

### 2. ZYRAKART

Enhanced version with dynamic pricing, product management, and improved UI for better user experience.

Also developed multiple small PHP projects focused on CRUD operations and backend logic.

### 3. AMAZON & NETFLIX clone website design

Developed an e-commerce website clone that mimics core features of Amazon's online store.

- Built a dynamic product catalog with filtering, searching, and sorting functionalities using React.
- Designed and implemented a shopping cart system to add/remove products in real-time.
- Simulated a basic checkout and payment process using Stripe (or just a mock payment gateway).
- Developed an admin dashboard for adding and managing products with backend integration in HTML & CSS.
- Ensured mobile responsiveness and a smooth user experience across all devices.

## Internship Experience

### Finch Technologies, Vaishali (Delhi)

3-Month Internship

Worked on live PHP projects, learned Laravel framework, and explored Java basics while collaborating with the development team.
